18 MAY to 20 MAY 2021
Sofitel Hamburg Alter Wall
Hamburg Germany

THE MOTORSHIP PROPULSION & Future Fuels Conference
SPONSORSHIP OPPORTUNITIES
The Motorship Propulsion & Future Fuels Conference first launched in 2018 as a combined and enhanced event celebrating over 40 years of The Motorship’s Propulsion & Emissions Conference, and nearly 10 years of the Gas Fuelled Ships Conference.

Over 42 years The Motorship Conferences have explored the evolution of LNG and other clean, low-flashpoint fuels, and has become the conference for delegates seeking up to the minute information about future fuel frontrunners such as ammonia, hydrogen, methanol, ethane, VOCs, wind, biofuels and many more. With 50% absolute carbon reduction by 2050, alternative fuels are now an essential feature alongside ship owner’s propulsion and powering considerations.

At Propulsion & Future Fuels 2019 attendees benefitted from insightful technical presentations covering a range of future fuels and innovative propulsion design projects either in streams or plenary sessions over two days, with the event culminating in a technical visit to an LNG bunker barge on day three.

Hamburg is the location for Propulsion & Future Fuels due to its strong presence in the global shipping sector. The city boasts some of the best transport links of any European destination and sits at the heart of a robust German shipping market. Germany has the fifth largest merchant fleet in the world, with 328 shipping companies representing more than 2,300 vessels.

The 101 shipping companies based in Hamburg, representing 67% of Germany’s gross tonnage, provide Propulsion and Future Fuels with a solid industry foundation.

The 2021 conference will provide senior executives with a meeting place to learn, discuss and share knowledge of the latest developments in efficient propulsion technology and low flashpoint, low carbon fuels. It is a must-attend event for CEOs and technical directors from ship owning/operating and management companies, ship design and ship building senior executives, sector specialists from fuel, equipment and technology suppliers plus senior management and advisors from classification and policy-making organisations.

The Motorship Propulsion and Future Fuels Conference provides an exceptional platform for your company to market itself through our varied sponsorship packages. It brings all the benefits of your brand being associated with premium content in a face-to-face thought leadership environment.
By having a dedicated Mercator Media account manager, GTT has been given the opportunity to have a tailor-made marketing package through print, online and event sponsorship. This enables us to focus on targeted and efficient communication tools and emphasises the company visibility in relevant fields such as LNG as a fuel market.

Julien Bec, Vice President LNG Fuel Division, GTT

2021 marks the 42nd anniversary of Motorship Conferences, making our conference the longest running technical conference in the maritime sector.

Motorship Conferences attract shipowner panels representing in excess of 5,000 ships, featuring strong support and chairmanship from two of the sectors heavy weight associations: BIMCO, whose shipowner members represent more than 60% of global tonnage, and the German shipowner association VDR, headquartered in Hamburg and representing a fleet of 2,324 ships with a combined gross tonnage of 57.5 million.

What is The Motorship?
The Motorship has been published since 1920 and is the longest running technical title within the marine sector. It provides insight for marine technology professionals in print, online and through regular eNews and social media. With a monthly combined audience of 34,959 this title underpins the success of its sister events.

What is Propulsion and Future Fuels?
The Motorship Propulsion and Future Fuels Conference 2019 attracted a 200-strong audience from 19-21 November 2019 in Hamburg. It provided decision makers from the ship operating sector, ship design and construction companies, fuel, equipment and technology suppliers plus classification and policy-making organisations with a meeting place to learn, discuss and knowledge share solutions to operational and regulatory challenges.

In 2021 this will continue, with emphasis on the next steps to 2030 and 2050; and an in-depth analysis of ship operators’ future fuel considerations with sessions featuring expert presentations from a selection of fuel and equipment manufacturers, policy makers, safety experts, shipowners, and class societies.

The previous edition of The Motorship Propulsion & Future Fuels Conference in 2019 and attracted 200 attendees, from 30 countries. The audience included over 30 operators managing a combined fleet in excess of 5,100 ships. The highest proportion of delegates of the combined events were shipowners and yards (35%).

Propulsion and Future Fuels is the Rolls Royce of Technical Conferences.

Peter Dan Petersen, Senior Manager, MAN Energy Solutions

Ship Owner Panel (left to right)
Tor Øyvind Ask - Fleet Director, Solvang ASA
Oliver Tiedtchen - Director of Shipmanagement - Nordic Hamburg Shipmanagement
